DETAILED ACTION

In response to the Applicant's amendment submitted on September 06, 2005. In the reconsideration, the rejection of the last office action is withdrawn.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 27-29, drawn to a radio module for an electrical device, classified in class 343, subclass 841, 702.
 - II. Claims 20-24, 26 and 30, drawn to a system, classified in class 455, subclass 73, 63.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Invention Group II comprising a plurality of radio modules within the plurality of electrical devices to enable the plurality of electrical devices to communicate wirelessly such as computer, scanner, modem, etc... while Invention Group I disclose a radio antenna with an electromagnetic shield that operates totally different from Invention Group II, and Invention Group I does not comprise any electrical device to communicate wirelessly as required by Invention Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
